1. NATURE AND CONTINUANCE OF OPERATIONS

Turmalina Metals Corp. (the "Company") was incorporated in Canada under the British Columbia Corporations Act on March 21, 2017. The Company is principally engaged in the acquisition and exploration of resource properties. The Company's shares are publicly traded on the TSX Venture Exchange (the "TSXV") under the symbol TBX. The head office, records office, and principal address of the Company is 400-850 West Hastings Street, Vancouver, British Columbia, V6C 1E1. The Company is in the process of investing in potential new acquisitions and exploring and evaluating its resource properties and has not yet determined whether the properties contain ore reserves that are economically recoverable.

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation. The Company has incurred losses from inception and does not currently have the financial resources to sustain operations in the long-term. While the Company has been successful in obtaining its required funding in the past, there is no assurance that such future financing will be available or be available on favourable terms. An inability to raise additional financing may impact the future assessment of the Company as a going concern. These material uncertainties may cast significant doubt about the ability of the Company to continue as a going concern.

In March 2020, the World Health Organization declared coronavirus COVID-19 a global pandemic. This contagious disease outbreak, which has continued to spread, and any related adverse public health developments, has adversely affected workforces, economies, and financial markets globally, potentially leading to an economic downturn. It is not possible for the Company to predict the duration or magnitude of the adverse results of the outbreak and its effects on the Company's business or ability to raise funds.

These consolidated financial statements do not include adjustments to amounts and classifications of assets and liabilities that might be necessary should the Company be unable to continue operations. Continued operations of the Company are dependent on the Company's ability to receive financial support, necessary financings, or generate profitable operations in the future.

2. BASIS OF PREPARATION

Statement of compliance

These condensed consolidated interim financial statements, including comparatives, have been prepared in accordance with International Financial Reporting Standards ("IFRS") and International Accounting Standards ("IAS") 34 "Interim Financial Reporting" as issued by the International Accounting Standards Board ("IASB").

This condensed interim financial report does not include all of the information required of a full annual financial report and is intended to provide users with an update in relation to events and transactions that are significant to an understanding of the changes in financial position and performance of the Company since the end of the last annual reporting period. It is therefore recommended that this financial report be read in conjunction with the annual audited financial statements of the Company for the year ended December 31, 2020.

Basis of consolidation

These consolidated financial statements include the accounts of the Company and its subsidiaries, Aurora Mining S.A. (Argentina -100% effective interest) and Aurora Copper Peru S.A.C. (Peru -100% effective interest). The subsidiaries' principal activity is mineral exploration.

2. BASIS OF PREPARATION (cont'd...)

Basis of consolidation (cont'd...)

Subsidiaries are all entities over which the Company has exposure to variable returns from its involvement and has the ability to use power over the investee to affect its returns. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Company controls another entity. Subsidiaries are fully consolidated from the date on which control is transferred to the Company until the date on which control ceases.

The accounts of subsidiaries are prepared for the same reporting period as the parent company, using consistent accounting policies. Inter-company transactions, balances and unrealized gains or losses on transactions are eliminated upon consolidation.

Basis of measurement

These consolidated financial statements are presented in Canadian dollars, which is also the Company's and its subsidiaries' functional currency and have been prepared on a historical cost basis, except for certain financial instruments, which are carried at fair value. In addition, these consolidated financial statements have been prepared using the accrual basis of accounting, except for cash flow information.

Significant Accounting Judgments and Estimates

The preparation of these condensed consolidated interim financial statements requires management to make judgments and estimates and form assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of expenses during the reporting period. On an ongoing basis, management evaluates its judgments and estimates in relation to assets, liabilities and expenses. Management uses historical experience and various other factors it believes to be reasonable under the given circumstances as the basis for its judgments and estimates. Actual outcomes may differ from these estimates.

The most significant estimates relate to the valuation of deferred income tax amounts, impairment testing and calculation of share-based payments.

The most significant judgments relate to the impairment of exploration and evaluation assets and the determination of the functional currency of the Company and its subsidiaries.

4. MINERAL PROPERTY

Title to mineral property interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and titles may be affected by undetected defects.

El Tapau Project, Argentina

On September 24, 2018, the Company entered into an option agreement with third parties to acquire a 100% interest in certain claims known as the El Tapau Project, Argentina. The Company can acquire a 100% interest in the property by making payments and incurring exploration expenditures and drilling as follows:

The third parties retain a 1% NSR royalty, which the Company may purchase for a payment of USD\$300,000.

Canchaque Project, Peru

On March 9, 2019, which was subsequently amended on September 6, 2019 and August 31, 2020, the Company entered into an option agreement, with third parties, to acquire a 100% interest in certain claims located in Peru, comprising the Canchaque Project. The Company could acquire a 100% interest in the property by making payments totaling US\$4,900,000, (of which the Company paid US\$200,000), by incurring expenditures of US\$2,500,000 and by incurring 11,500 meters drilling over 5 years. During the year ended December 31, 2020, the Company acquired additional claims contiguous to the Canchaque Project for \$54,248.

During the year ended December 31, 2020, the Company terminated the agreement due to delays obtaining the necessary permits and access to advance the project and wrote-off associated acquisition costs of \$323,725.

Chanape Project, Peru

On March 13, 2020, the Company entered into an option agreement, with third parties, to acquire a 100% interest in certain claims located in Peru, comprising the Chanape Project. The Company can acquire a 100% interest in the property by making total cash payments of US\$3,410,000 and by incurring exploration expenditures of US\$2,000,000 as follows:

4. MINERAL PROPERTY (cont'd...)

7. FINANCIAL AND CAPITAL RISK MANAGEMENT

Financial assets and liabilities are classified in the fair value hierarchy according to the lowest level of input that is significant to the fair value measurement. Assessment of the significance of a particular input to the fair value measurement requires judgement and may affect placement within the fair value hierarchy levels. The hierarchy is as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The carrying value of receivables and accounts payable and accrued liabilities approximates fair value due to the shortterm nature of the financial instruments. Cash and cash equivalents is valued at a level 1 fair value measurement and is classified as fair value through profit or loss. Receivables are classified at amortized cost. Accounts payable and accrued liabilities are classified as amortized cost.

Risk management

The Company is exposed to varying degrees to a variety of financial instrument related risks:

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual obligations.

The Company's cash and cash equivalents is held at a large Canadian financial institution in interest bearing accounts. The Company has no investment in asset backed commercial paper.

The Company's receivables consist of goods and services tax receivable from the government of Canada.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due.

The Company manages liquidity risk through its capital management as outlined below. Accounts payable and accrued liabilities are due within one year.

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, foreign exchange rates, and commodity and equity prices.

a) Interest rate risk

The Company's exposure to interest rate risk arises from the interest rate impact on cash and cash equivalents. The Company's practice has been to invest cash and cash equivalents at floating rates of interest, in order to maintain liquidity, while achieving a satisfactory return for shareholders. There is minimal risk that the Company would recognize any loss as a result of a decrease in the fair value of any guaranteed bank investment certificates included in cash and cash equivalents as they are generally held with large financial institutions. During the period ended June 30, 2021, the Company was not exposed to significant interest rate risk.

7. FINANCIAL AND CAPITAL RISK MANAGEMENT (cont'd...)

b) Foreign currency risk

The majority of purchases are transacted in the Canadian dollar. Management believes the foreign exchange risk derived from currency conversions is not significant and therefore does not hedge its foreign exchange risk.

c) Price risk

The Company is exposed to price risk with respect to commodity prices. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company.

Capital management

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern in order to pursue acquisition, exploration and evaluation of mineral properties and to maintain a flexible capital structure which optimizes the costs of capital at an acceptable risk. In the management of capital, the Company includes its components of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares, issue debt, acquire or dispose of assets or adjust the amount of cash.

The Company currently is not subject to externally imposed capital requirements. There were no changes in the Company's approach to capital management.

8. SEGMENT INFORMATION

The Company operates in one reportable operating segment, being the acquisition, exploration, and evaluation of resource properties in multiple geographical location, refer to Note 5.

9. SUBSEQUENT EVNTS

Subsequent to June 30, 2021, the Company granted 900,000 stock options to directors and consultants of the Company, exercisable at a price of \$0.91 for a period of 5 years.
